Graphic Novel

Interior Page Template

Finished page size: 6.75" x 10.25"

Any interior or content text is intended to stay within the safe area. Bleed extends 0.125" (1/8") on all sides of the page.

Any objects that extend or bleed past the edge of the page will be trimmed off when the final page is cut.

Keep in mind, with binding a page's inner edge is harder to read than the outer edge. Also, the inner edge will be closer to the binding and will get cut a bit more than the outer edge.

Text: Use a legible font. Avoid using too many different fonts. Avoid using text over busy areas. Use a font size that is legible. Avoid using too small of a font size. Use a font that is appropriate for the story. Example: Don't use a cursive font for a story about a serial killer. Don't use "Papyrus" font. Use the same font for the entire book. Use a font that is legible. Use a font that is legible.

Text needs to be at least 1pt away from the trim line.

Textless version (inside binding): Text that begins and ends on the inside of the page should be avoided (inside binding). Example: 10, 11, 12, 13, etc.

You need to "bleed off" or delete this type before creating your final PDF file for print.
